

# IP914/2 Balloon dilation of a eustachian tube for eustachian tube dysfunction

SNOMED CT provides clinical terms for entry into the patient record to record clinical information relevant to that encounter; the mandated classifications (OPCS-4 or ICD-10) provide a method to collect and aggregate data to allow accurate and consistent data analysis.

#### Procedure and device:

## SNOMED CT preferred term (concept ID)

A request for a new SNOMED CT code has been submitted for the next release. SNOMED CT Submission Portal request reference number 28345.

## OPCS-4 code(s):

D22.2 Intubation of eustachian canal

Y76.6 Endonasal endoscopic approach to other body cavity

Y40.3 Balloon dilation of organ NOC

## Diagnosis or health condition:

## **SNOMED CT preferred term (concept ID)**

Dysfunction of eustachian tube (56713002)

#### ICD-10 code(s):

H69.- Other disorders of Eustachian tube

## Clinical coding recommendations for NICE guidance

For each published interventional procedure and medical technologies guidance, we work with NHS Digital to provide relevant clinical coding information.

SNOMED CT provides clinical terms for entry into the patient record to store clinical information relevant to that encounter.

The mandated classifications (OPCS-4 or ICD-10) provide a method to collect and aggregate data to allow accurate and consistent data analysis.

NICE and NHS Digital Information Representation Services work collaboratively to ensure the most appropriate SNOMED CT, OPCS-4 and ICD codes are provided.

NHS Digital is the national release centre for the UK edition of SNOMED CT, ICD and OPCS-4. Further SNOMED CT information including licensing, see <a href="here">here</a>. Further Classifications information, see <a href="here">here</a>.
