National Institute for Health and Care Excellence

Lung cancer: diagnosis and management (update)

Search strategies

NICE guideline <number>
Search strategies
February 2019

Commissioned by the National Institute for Health and Care Excellence

Disclaimer

The recommendations in this guideline represent the view of NICE, arrived at after careful consideration of the evidence available. When exercising their judgement, professionals are expected to take this guideline fully into account, alongside the individual needs, preferences and values of their patients or service users. The recommendations in this guideline are not mandatory and the guideline does not override the responsibility of healthcare professionals to make decisions appropriate to the circumstances of the individual patient, in consultation with the patient and, where appropriate, their carer or guardian.

Local commissioners and providers have a responsibility to enable the guideline to be applied when individual health professionals and their patients or service users wish to use it. They should do so in the context of local and national priorities for funding and developing services, and in light of their duties to have due regard to the need to eliminate unlawful discrimination, to advance equality of opportunity and to reduce health inequalities. Nothing in this guideline should be interpreted in a way that would be inconsistent with compliance with those duties.

NICE guidelines cover health and care in England. Decisions on how they apply in other UK countries are made by ministers in the <u>Welsh Government</u>, <u>Scottish Government</u>, and <u>Northern Ireland Executive</u>. All NICE guidance is subject to regular review and may be updated or withdrawn.

1. Scoping search strategies

1.1 Scoping searches

Scoping searches were undertaken on the following websites and databases (listed in alphabetical order) in April 2017 to provide information for scope development and project planning. Browsing or simple search strategies were employed.

Guidelines/website	Systematic review/economic evaluations
American Cancer Society	Campbell Collaboration
American College of Chest Physicians	Cochrane Database of Systematic Reviews
American Society for Radiation Oncology	(CDSR)
American Thoracic Society	Database of Abstracts of Reviews of Effects
Association for Molecular Pathology	(DARE) – last updated April 2015
British Lung Foundation	DUETS
British Thoracic Society	Health Technology Assessment (HTA) Database
Canadian Medical Association Infobase	 last updated October 2016 NHS Economic Evaluation Database (NHS)
Canadian Task Force on Preventive Health Care	EED) – last updated April 2015
Cancer Australia	NIHR Health Technology Assessment
Cancer Care Ontario	Programme
Cancer Control Alberta	NIHR Health Services and Delivery Research
Cancer Research UK	(HS&DR) Programme
Care Quality Commission	PROSPERO
College of American Pathologists	TRIP Database
Core Outcome Measures in Effectiveness Trials (COMET)	
Department of Health & Social Care	
European Respiratory Society	
European Society for Medical Oncology	
European Society of Gastrointestinal Endoscopy	
European Society of Thoracic Surgery	
General Medical Council	
Guidelines & Audit Implementation Network (GAIN)	
Guidelines International Network (GIN)	
Healthtalk Online	
International Association for the Study of Lung	
Cancer	
MacMillan Cancer Support	
Medicines and Products Regulatory Agency (MHRA)	
National Audit Office	
National Cancer Intelligence Network	
National Clinical Audit and Patient Outcomes	
Programme	
National Health and Medical Research Council - Australia	
National Institute for Health and Care Excellence (NICE) - published & in development guidelines	

Guidelines/website	Systematic review/economic evaluations

1.2 Main searches

Bibliographic databases searched for the guideline

- Cochrane Database of Systematic Reviews CDSR (Wiley)
- Cochrane Central Register of Controlled Trials CENTRAL (Wiley)
- Database of Abstracts of Reviews of Effects DARE (Wiley)
- Health Technology Assessment Database HTA (Wiley)
- EMBASE (Ovid)
- MEDLINE (Ovid)
- MEDLINE Epub Ahead of Print (Ovid)
- MEDLINE In-Process (Ovid)

1.3 Identification of evidence for review questions

The searches were conducted between October 2017 and April 2018 for 9 review questions (RQ).

Searches were re-run in May 2018.

Where appropriate, in-house study design filters were used to limit the retrieval to, for example, randomised controlled trials. Details of the study design filters used can be found in section 3.

2. Review question search strategies

2.1 Search strategy review questions

RQ1.1: What is the clinical and cost effectiveness of using non-ultrasound-guided TBNA, EBUS-TBNA or EUS-FNA as the first test for people with an intermediate probability of mediastinal malignancy?

RQ1.2: What is the clinical and cost-effectiveness of EBUS-TBNA alone, EUS-FNA alone or EBUS-TBNA and EUS-FNA in combination compared with surgical staging to diagnose and/or stage lung cancer?

Table 1: search strategy

4. Health economics search strategies

4.1 Economic evaluations and quality of life data

Sources searched to identify economic evaluations

- NHS Economic Evaluation Database NHS EED (Wiley) last updated Apr 2015
- Health Technology Assessment Database HTA (Wiley) last updated Oct 2016
- Embase (Ovid)
- MEDLINE (Ovid)
- MEDLINE In-Process (Ovid)

Search filters to retrieve economic evaluations and quality of life papers were appended to the review question search strategies. For some health economics strategies additional terms were added to the original review question search strategies (see sections 4.2, 4.3 and 4.4) The searches were conducted between October 2017 and April 2018 for 9 review questions (RQ).

Searches were re-run in May 2018.

Searches were limited to those in the English language. Animal studies were removed from results.

4.2 Search strategy review questions

RQ1.1: What is the clinical and cost effectiveness of using non-ultrasound-guided TBNA, EBUS-TBNA or EUS-FNA as the first test for people with an intermediate probability of mediastinal malignancy?

RQ1.2: What is the clinical and cost-effectiveness of EBUS-TBNA alone, EUS-FNA alone or EBUS-TBNA and EUS-FNA in combination compared with surgical staging to diagnose and/or stage lung cancer?
