

Economic Plan

This document identifies the areas prioritised for economic modelling. The final analysis may differ from those described below. The rationale for any differences will be explained in the guideline.

1 Guideline

Diabetes in pregnancy: management of diabetes and its complications from preconception to the postnatal period (update)

2 List of Modelling Questions

Clinical questions by scope area	Screening, diagnosis and treatment for gestational diabetes
Population	Pregnant women
Interventions considered for inclusion	<p><u>Screening timing</u> 1st trimester 24-28 weeks No screening</p> <p><u>Screening strategy</u> No screening Universal testing with oral glucose tolerance test Risk factor Bio-chemical tests</p> <p><u>Diagnostic criteria</u> IADPSG WHO 2006</p> <p><u>Treatment</u> Metformin Glibenclamide Insulin</p>
Type of analysis	Cost-utility analysis
Clinical questions by scope area	The effectiveness of continuous glucose monitoring in pregnant women with diabetes when compared with intermittent capillary blood glucose monitoring.
Population	Pregnant women with diabetes

Interventions considered for inclusion	Continuous glucose monitoring Capillary blood glucose testing
Type of analysis	Cost-utility analysis
