|-------|-----|------|---------------------------|---------|---------|-------|
| 2 | 10 | 5 | 1.41 | 4 | 6 | 2 |

To which gender identity do you most identify?

Did the procedure work?

If somewhat or no, please provide further details along with information about whether symptoms later reoccurred.

I feel that I have improved, however I'm still in the recovery period so I think it's too early to say

Did you have any side-effects following your procedure?

IP 973_3

If yes, please provide further details along with information about whether symptoms later reoccurred.

A lot of post operative pain. Mostly at night after eating.
expected side effects so far

How long did it take you to recover from the procedure?

Its only been 4 weeks. The pain is still there but the acid reflux has completely stopped
still recovering

**How did the procedure positively affect your condition and/or your quality of life?
Please consider things such as:**

- Your physical symptoms
- Your ability to perform daily activities
- Your quality of life, lifestyle and/or social life
- Your state of mind, emotional health and/or wellbeing
- The effect on family, friends and others

Its great. I can spend long hours at the desk without reflux problems. I can run, go to the gym, no reflux sickness. I can eat what I want without the expectant sickness, heartburn and chest tightness. Its been wonderful, once the post operative pain ends it will completely change my life and let me enjoy life a lot more whether work or social life, it has been a life changing operation for the better.
too early to say

**How did the procedure negatively affect your condition and/or your quality of life?
Please consider things such as:**

- Your physical symptoms
- Your ability to perform daily activities
- Your quality of life, lifestyle and/or social life
- Your state of mind, emotional health and/or wellbeing
- The effect on family, friends and others

The post operative pain has been a bit intense and had to have a lot of painkillers but its only been 4 weeks and the pain is getting less over time.
too early to say

Did you require anymore treatment, including procedures or surgery after this procedure?

Yes (-)

No (2)  100%

IP 973_3

Would you recommend this procedure to another patient with your condition?

If yes, what might you tell them?

If acid reflux is becoming a problem with normal life, with work, with your social life, the sickness, the sore throats, the chest tightness, the worry of future problems, its well worth it, its a quick procedure, there is a little bit of post operative pain (which I'm sure differs from person to person), but its a very small price to pay for all the decades ahead of you of being acid reflux free. Its a lifev changer.

things have improved and if this can stop further issues in the future then it's got to be done,
