Equality impact assessment

Heavy Menstrual Bleeding: assessment and management (update)

The impact on equality has been assessed during guidance development according to the principles of the NICE equality policy.

1.0 Checking for updates and scope: before scope consultation (to be completed by the Developer and submitted with the draft scope for consultation)

1.1 Have any potential equality issues been identified during the check for an update or during development of the draft scope, and, if so, what are they?

(Please specify if the issue has been highlighted by a stakeholder)

The following groups have been identified:

- Women who have difficulties communicating in English
- Women with learning difficulties
- Women from minority ethnic groups (women from some minority ethnic groups may find it difficult to talk about HMB with health care professionals).
- Women from disadvantaged socio-economic groups

1.2 What is the preliminary view on the extent to which these potential equality issues need addressing by the Committee? For example, if population groups, treatments or settings are excluded from the scope, are these exclusions justified – that is, are the reasons legitimate and the exclusion proportionate?

For groups where equality issues have been identified the Committee will consider whether data should be analysed separately and whether separate recommendations are required on a case-by-case basis.
