

1 Appendix D- Health Economics Extractions

No economic evidence was retrieved.

| Study details | Population & interventions | Health outcomes | Costs | Cost effectiveness |
|---|--|--|--|--|
| Economic analysis: Study design: Perspective: Time horizon: Discounting: | Population: Intervention 1: Intervention 2: | Health outcomes incorporated: Mean total QALYs (95% CI) | Cost components incorporated: Mean total costs (95% CI) Currency & cost year: | Basecase ICERs (£ / QALY gained): Subgroup analyses: Analysis of uncertainty: |
| Data sources | | | | |
| Health outcomes: Quality-of-life weights: Cost sources: | | | | |
| Comments | | | | |
| Source of funding: Limitations: Other: | | | | |
| Overall quality*: | | Overall applicability**: | | |

Abbreviations: ICER = incremental cost-effectiveness ratio

*Very serious limitations / Potentially serious Limitations / Minor limitations; ** Directly applicable / Partially applicable / Not applicable
