

# 1 Appendix D- Health Economics Extractions

No economic evidence was retrieved.

Study details	Population & interventions	Health outcomes	Costs	Cost effectiveness
<b>Economic analysis:</b>	<b>Population:</b>	<b>Health outcomes incorporated:</b>	<b>Cost components incorporated:</b>	<b>Basecase ICERs (£ / QALY gained):</b>
<b>Study design:</b>	<b>Intervention 1:</b>	<b>Mean total QALYs (95% CI)</b>	<b>Mean total costs (95% CI)</b>	<b>Subgroup analyses:</b>
<b>Perspective:</b>	<b>Intervention 2:</b>			<b>Analysis of uncertainty:</b>
<b>Time horizon:</b>			<b>Currency &amp; cost year:</b>	
<b>Discounting:</b>				
<b>Data sources</b>				
<b>Health outcomes:</b>				
<b>Quality-of-life weights:</b>				
<b>Cost sources:</b>				
<b>Comments</b>				
<b>Source of funding:</b>				
<b>Limitations:</b>				
<b>Other:</b>				
<b>Overall quality*:</b>		<b>Overall applicability**:</b>		

Abbreviations: ICER = incremental cost-effectiveness ratio

\*Very serious limitations / Potentially serious Limitations / Minor limitations; \*\* Directly applicable / Partially applicable / Not applicable
