

## Hip fracture: Guideline Update

### 1 Background

The hip fracture guideline (CG124) was reviewed in 2015 as part of NICE's routine surveillance programme to decide whether the guideline requires updating.

### 2 Surveillance programme findings

The surveillance programme identified new evidence on displaced hip fracture repair. The full report can be found [here](#).

### 3 Guideline Update

We are answering the following question(s):

- What is the clinical and cost effectiveness of internal fixation compared with hemiarthroplasty compared with total hip replacement (THR) in people undergoing repair for a displaced intracapsular hip fracture?
- What is the clinical and cost effectiveness of conservative management compared with internal fixation compared with hemiarthroplasty compared with total hip replacement (THR) in people with an undisplaced intracapsular hip fracture?

### 4 Guideline Update process

The guideline update will be produced using a standing Committee.

Committee meeting dates: 05 September 2016, 02 December 2016 & 28 February 2017

Consultation dates: 18 January 2017 – 15 February 2017

Expected publication date: 26 April 2017
