

# Economic Plan

This document identifies the areas prioritised for de Novo economic analysis. The final analysis may differ from those described below. The rationale for any differences will be explained in the guideline.

## 1 Guideline

**Familial breast cancer:** The classification and care of women at risk of familial breast cancer in primary, secondary and tertiary care (update), including the management of women and men diagnosed with breast cancer who also have a history of familial breast cancer.

## 2 List of Modelling Questions

<b>Clinical questions by scope area</b>	The risk threshold at which genetic testing should be offered to people (for the update this part of the topic will be extended to include the threshold for offering testing to men as well as women).
Population	The model will include men and women, those at risk with breast cancer and those without.
Interventions considered for inclusion	<ul style="list-style-type: none"> <li>• Genetic testing at different risk thresholds</li> <li>• No testing</li> </ul>
Type of analysis	Cost-utility analysis
<b>Clinical questions by scope area</b>	The specific surveillance needs of people with a personal history of breast cancer
Population	The model will include men and women who have a personal history of breast cancer.
Interventions considered for inclusion	<ul style="list-style-type: none"> <li>• Surveillance</li> <li>• No surveillance</li> </ul>
Type of analysis	Cost-utility analysis
