Afternoon notes (Stable Chest Pain)

1. The committee and experts had no new declarations of interest and it was agreed that all interests were 'declare and participate' for Stable chest pain.
2. CH presented an overview of the topic. The topic experts were asked to give an overview of the ten diagnostic tests and in the absence of the lay member to give the patient perspective in terms of suitability and acceptability. The Committee was invited to ask questions of the topic experts.
3. CH presented interim data on the diagnostic tests.

Close of day one

1. DL welcomed everyone to day 2 of the ninth meeting of the clinical guidelines updates Standing Committee. Apologies received from SW, AD, JG, TP.
2. The committee and experts had no new declarations of interest and it was agreed that all interests were 'declare and participate' for stable chest pain.
3. CH continued with the presentation of the data on the diagnostic tests and a discussion was held about the analytical approach to be taken for the clinical evidence.
4. PC presented the economic model from the current guideline. A discussion was held about the approach to be taken for updating the model.
