Prefer not to say (-)

Other (-)

## Did the procedure work?

Yes (6)  100%

Somewhat (-)

No (-)

## Did you have any side-effects following your procedure?

If **yes**, please provide further details along with information about whether symptoms later reoccurred.

---

Shoulder pain for 2 weeks has not returned Ocassional mild discomfort in area of Operation. Very mild

## How long did it take you to recover from the procedure?

---

6 weeks

---

3 weeks

---

Immediately. Overnight stay.

---

Around 2 weeks to get back to work and normal life and a 4 weeks soft food diet.

---

6 weeks to fully recover

---

4 weeks

How did the procedure positively affect your condition and/or your quality of life? Please consider things such as:

- Your physical symptoms
- Your ability to perform daily activities
- Your quality of life, lifestyle and/or social life
- Your state of mind, emotional health and/or wellbeing
- The effect on family, friends and others

---

Improved my QoL on all fronts

---

Relatively soon after operation I was able to do all things as before surgery. Eating was immediately possible. Slightly lesser meals ,as stomach slightly smaller. No more reflux . No impact on family

---

From a point where suicidal thoughts from how ill I had become, not being able to lead a normal life, close family feeling helpless by not able to help. Post operation transformed my life. Normality returned. Social life, hobbies, travel all returned.

---

It has had such a positive impact on my life after I have had the surgery. I have no symptoms where before I would be throwing up and violently coughing. I would be nervous about eating out, the chance of throwing up in public or work. The medication did help with the symptoms but the minute I would forget one they would come back that same day and I knew I would then be in for a bad day. My children would see me suffer and once when they had a stomach bug broken down about how they did not want to be like me and throw up all the time as they did not like it. Since I have explained to them what I had done and they have had a stomach bug and they did not feel scared that this something they would have every day.

---

Has significantly reduced/stopped acid reflux. All medication has been stopped. Able to eat pretty much all foods. Absolutely pleased with the results

---

Eating, no regurgitation meant I was mentally comfortable and could enjoy food Acid reflux issues all cured after the procedure

How did the procedure negatively affect your condition and/or your quality of life?  
Please consider things such as:

- Your physical symptoms
- Your ability to perform daily activities
- Your quality of life, lifestyle and/or social life
- Your state of mind, emotional health and/or wellbeing
- The effect on family, friends and others

---

No negative effects

---

No negative effect Only very positive effect

---

Not applicable. Refer to earlier question.

---

It has not negatively affected my life.

---

Only really problem was shoulder pain for a number of weeks and slight difficulty swallowing post operation this has improved significantly. Started approximately 2 weeks after operation and has almost resolved 4 months post op. Still have symptoms occasionally

---

I lost weight in the short term after procedure due to recovery but that was the only negative and I put it all Back on once I could train again

Did you require anymore treatment, including procedures or surgery after this procedure?

No (6)  100%

Yes (-)

Would you recommend this procedure to another patient with your condition?

Yes (6)  100%

No (-)

If **yes**, what might you tell them?

---

it makes a positive difference, go for it.

---

Extremely good response with no discomfort,no more reflux

---

Although feeling as you do now the suffering and mental health so low, this operation will transform your life, so simple, so effective.

---

How quick the recovery is and how my symptoms have completely stopped straight after the surgery and how it had affected the quality of my life.

---

Wish I had the operation done 5 years ago

---

It will change your life for the better

If the procedure had an impact on any other areas of your life that are not covered by the questions above please tell us about them here.

---

None

---

Overall extremely please with the operation and would recommend to anyone that suffered acid reflux.
