Medical technologies evaluation programme

Equality impact assessment: Topic selection and scoping

MT336 The IN.PACT drug-coated balloon for femoro-popliteal peripheral arterial disease

The impact on equality has been assessed during this evaluation according to the principles of the [NICE Equality scheme](#).

1. Have any potential equality issues been identified during the development of the topic briefing note or during selection, and, if so, what are they?

During development of the scope it was noted that the technology is contraindicated in pregnant or breast-feeding women.

2. What is the preliminary view as to what extent these potential equality issues need addressing by the committee?

The equality issues raised require no additional or special consideration by the Committee beyond its normal process.

3. Has any change to the draft scope been agreed to highlight potential equality issues?

No

4. Have any additional stakeholders related to potential equality issues been identified during the scoping process, and, if so, have changes to the stakeholder list been made?

No
