

## NICE guidelines

### Equality impact assessment

#### Lower urinary tract symptoms in men, trans and non-binary people with a prostate: assessment and management (update)

The impact on equality has been assessed during guidance development according to the principles of the NICE equality policy.

#### **2.0 Checking for updates and scope: after consultation (to be completed by the Developer and submitted with the revised scope)**

2.1 Have any potential equality issues been identified during consultation, and, if so, what are they?

No new equality issues have been identified during consultation.

2.2 Have any changes to the scope been made as a result of consultation to highlight potential equality issues?

No changes have been made to the scope as a result of consultation.

2.3 Have any of the changes made led to a change in the primary focus of the guideline which would require consideration of a specific communication or engagement need, related to disability, age, or other equality consideration?

If so, what is it and what action might be taken by NICE or the developer to meet this need? (For example, adjustments to committee processes, additional forms of consultation)

No changes have been made to the scope as a result of consultation.
