

**NATIONAL INSTITUTE FOR HEALTH AND CARE  
EXCELLENCE**

**NICE guidelines**

**Equality impact assessment**

**Models of service delivery for people with learning disabilities and with behaviour that challenges**

The impact on equality has been assessed during guidance development according to the principles of the NICE equality policy.

**1.0 Scope: before consultation (To be completed by the developer and submitted with the draft scope for consultation)**

1.1 Have any potential equality issues been identified during the development of the draft scope, before consultation, and, if so, what are they?

The following characteristics were identified from the related guidance on the prevention and interventions for people with learning disabilities and whose behaviour that challenges and will be relevant for this review.

Ethnicity

- access for those from minority ethnic groups and older adults

Age

- a higher prevalence of restraint with young males
- Access issues for older adults

Degree of disability

- needs of those with profound disabilities, particularly individuals who are non-verbal
- support for language skills both for those who have low verbal ability and those service users, families and carers who may have difficulty with English

Socio-economic status

- potential impact of socioeconomic status on early intervention from lack of funds/funding support

Religion or belief

- specific issues in relation to religion that may impact on the challenging behaviour of older children and young people

## Service model LDCB EIA form scoping

### Sexual orientation

Older children and young adults may have specific issues relating to sexual orientation that may impact on challenging behaviours

### Other

- needs of those within the criminal justice system

1.2 What is the preliminary view on the extent to which these potential equality issues need addressing by the Committee? For example, if population groups, treatments or settings are excluded from the scope, are these exclusions justified – that is, are the reasons legitimate and the exclusion proportionate?

People with dementia who demonstrate behaviour that challenges as a result of the dementia are excluded from scope as this population is likely to be covered in another NICE guideline.

### **2.0 Scope: after consultation (To be completed by the developer and submitted with the final scope)**

2.1 Have any potential equality issues been identified during consultation, and, if so, what are they?

## Service model LDCB EIA form scoping

2.2 Have any changes to the scope been made as a result of consultation to highlight potential equality issues?

2.3 Is the primary focus of the guideline a population with a specific disability-related communication need?

If so, is an alternative version of the 'Information for the Public' document recommended?

If so, which alternative version is recommended?

The alternative versions available are:

- large font or audio versions for a population with sight loss;
- British Sign Language videos for a population who are deaf from birth;
- 'Easy read' versions for people with learning disabilities or cognitive impairment.

### 3.0 Guideline development: before consultation (to be completed by the developer before draft guideline consultation)

3.1 Have the potential equality issues identified during the scoping process been addressed by the Committee, and, if so, how?

3.2 Have any **other** potential equality issues (in addition to those identified during the scoping process) been identified, and, if so, how has the Committee addressed them?

3.3 Were the Committee's considerations of equality issues described in the consultation document, and, if so, where?

3.4 Do the preliminary recommendations make it more difficult in practice for a specific group to access services compared with other groups? If so, what are the barriers to, or difficulties with, access for the specific group?

## Service model LDCB EIA form scoping

3.5 Is there potential for the preliminary recommendations to have an adverse impact on people with disabilities because of something that is a consequence of the disability?

3.6 Are there any recommendations or explanations that the Committee could make to remove or alleviate barriers to, or difficulties with, access to services identified in questions 3.1, 3.2 or 3.3, or otherwise fulfil NICE's obligation to advance equality?

### 4.0 Final guideline (to be completed by the Developer before GE consideration of final guideline)

4.1 Have any additional potential equality issues been raised during the consultation, and, if so, how has the Committee addressed them?

4.2 If the recommendations have changed after consultation, are there any recommendations that make it more difficult in practice for a specific group to access services compared with other groups? If so, what are the barriers to, or difficulties with, access for the specific group?

4.3 If the recommendations have changed after consultation, is there potential for the recommendations to have an adverse impact on people with disabilities because of something that is a consequence of the disability?

4.4 If the recommendations have changed after consultation, are there any recommendations or explanations that the Committee could make to remove or alleviate barriers to, or difficulties with, access to services identified in questions 4.2, 4.3 and 4.4, or otherwise fulfil NICE's obligations to advance equality?

## Service model LDCB EIA form scoping

4.5 Have the Committee's considerations of equality issues been described in the final guideline document, and, if so, where?
