**Equality impact assessment – Scoping**

**Selpercatinib for treating advanced thyroid cancer with RET alterations  
(managed access review of TA742) [ID6288]**

The impact on equality has been assessed during this evaluation according to the principles of the NICE Equality scheme.

1. Have any potential equality issues been identified during the scoping process (draft scope consultation and scoping workshop discussion), and, if so, what are they?

During consultation, it was noted that thyroid cancer is more common in females.

2. What is the preliminary view as to what extent these potential equality issues need addressing by the Committee?

This issue will be taken into account in the committee's decision making.

3. Has any change to the draft scope been agreed to highlight potential equality issues?

No.

4. Have any additional stakeholders related to potential equality issues been identified during the scoping process, and, if so, have changes to the stakeholder list been made?

No.
