

IPG123 Cryoblation for atrial fibrillation in association with other cardiac surgery

SNOMED CT provides clinical terms for entry into the patient record to record clinical information relevant to that encounter; the mandated classifications (OPCS-4 or ICD-10) provide a method to collect and aggregate data to allow accurate and consistent data analysis.

Procedure and device:

SNOMED CT preferred term (concept ID)

Open cryoablation of atrioventricular node (854001000000102)

OPCS-4 code(s):

K52.1 Open ablation of atrioventricular node

Or

K52.8 Other specified open operations on conducting system of heart

The following code would be assigned in addition to one of the above codes:

Y11.2 Cryotherapy to organ NOC

Plus

Y73.1 Cardiopulmonary bypass

Note: If code **K52.8** is chosen, the site code **Z33.6 Atrium of heart** is assigned following **Y11.2**.

Diagnosis or health condition:

SNOMED CT preferred term (concept ID)

Atrial fibrillation (49436004)

ICD-10 code(s):

I48.- Atrial fibrillation and flutter

Clinical coding recommendations for NICE guidance

For each published interventional procedure and medical technologies guidance, we work with NHS Digital to provide relevant clinical coding information.

SNOMED CT provides clinical terms for entry into the patient record to store clinical information relevant to that encounter.

The mandated classifications (OPCS-4 or ICD-10) provide a method to collect and aggregate data to allow accurate and consistent data analysis.

NICE and NHS Digital Information Representation Services work collaboratively to ensure the most appropriate SNOMED CT, OPCS-4 and ICD codes are provided.

NHS Digital is the national release centre for the UK edition of SNOMED CT, ICD and OPCS-4. Further SNOMED CT information including licensing, see [here](#). Further Classifications information, see [here](#).
