

IPG134 Photodynamic therapy for bile duct cancer

SNOMED CT provides clinical terms for entry into the patient record to record clinical information relevant to that encounter; the mandated classifications (OPCS-4 or ICD-10) provide a method to collect and aggregate data to allow accurate and consistent data analysis.

Procedure and device:

SNOMED CT preferred term (concept ID)

A request for a new SNOMED CT code has been submitted for the next release. [SNOMED CT Submission Portal request](#) reference number xxxxx.

OPCS-4 code(s):

J41.4 Endoscopic retrograde photodynamic laser therapy of lesion of bile duct

Or

J48.4 Percutaneous photodynamic therapy of lesion of bile duct

Note: Codes in category **Y53 Approach to organ under image control** and **Y68 Other approach to organ under image control** are used as additional codes for any procedure that uses image control that may or may not be performed via percutaneous approach.

When a procedure has been performed using image control and the code that classifies the procedure **does not** state the type of image control used, then a code from these categories **must be** assigned. If the specific method of image control is not stated, the fourth-character **.9** must be assigned.

Note: The code assignment depends on whether the procedure is carried out with the use of an endoscope (**J41.4**) or percutaneously (**J48.4**).

Diagnosis or health condition:

SNOMED CT preferred term (concept ID)

A request for a new SNOMED CT code has been submitted for the next release. [SNOMED CT Submission Portal request](#) reference number xxxxx.

ICD-10 code(s):

C24.0 Malignant neoplasm of extrahepatic bile duct

Clinical coding recommendations for NICE guidance

For each published interventional procedure and medical technologies guidance, we work with NHS Digital to provide relevant clinical coding information.

SNOMED CT provides clinical terms for entry into the patient record to store clinical information relevant to that encounter.

The mandated classifications (OPCS-4 or ICD-10) provide a method to collect and aggregate data to allow accurate and consistent data analysis.

NICE and NHS Digital Information Representation Services work collaboratively to ensure the most appropriate SNOMED CT, OPCS-4 and ICD codes are provided.

NHS Digital is the national release centre for the UK edition of SNOMED CT, ICD and OPCS-4. Further SNOMED CT information including licensing, see [here](#). Further Classifications information, see [here](#).
