

IPG239 - Laparoscopic techniques for hysterectomy

The mandated classifications (OPCS-4 or ICD-10) provide a method to collect and aggregate data to allow accurate and consistent data analysis.

Procedure:

Procedure and device:

OPCS-4 code(s):

Total laparoscopic hysterectomy [TLH]

Q07.4 Total abdominal hysterectomy

Y75.2 Laparoscopic approach to abdominal cavity NEC

Laparoscopic supracervical hysterectomy [LSH]

Q07.5 Subtotal abdominal hysterectomy

Y75.2 Laparoscopic approach to abdominal cavity NEC

Laparoscopically-assisted vaginal hysterectomy [LAVH]

Q08.9 Unspecified vaginal excision of uterus

Y75.1 Laparoscopically assisted approach to abdominal cavity

Note: If the clinical record is more specific, another code from category **Q08.-** may be appropriate with the addition of **Y75.1**.

Laparoscopic hysterectomy [LH]

Q07.4 Total abdominal hysterectomy NEC

Y75.2 Laparoscopic approach to abdominal cavity NEC

Y50.3 Vaginal approach

Note: If the clinical record is more specific, another code from category **Q07.-** may be appropriate with the addition of **Y75.2** and **Y50.3**.

Clinical coding recommendations for NICE guidance

For each published interventional procedure guidance, we work with NHS England to provide relevant clinical coding information.

The mandated classifications (OPCS-4 or ICD-10) provide a method to collect and aggregate data to allow accurate and consistent data analysis.

NICE and NHS England Terminology and Classifications Delivery Service work collaboratively to ensure the most appropriate OPCS-4 and ICD-10 codes are provided.

NHS England is the national release centre for the UK edition of ICD-10 and OPCS-4. Further Classifications information, see [here](#).
