
IPG294 – Percutaneous (non-thoracoscopic) epicardial catheter radiofrequency ablation for atrial fibrillation

The mandated classifications (OPCS-4 or ICD-10) provide a method to collect and aggregate data to allow accurate and consistent data analysis.

Procedure:

OPCS-4 code(s):

K64.1 Percutaneous radiofrequency ablation of epicardium

Y53.4 Approach to organ under fluoroscopic control

Diagnosis or health condition:

ICD-10 code(s):

I48.- Atrial fibrillation and flutter

Clinical coding recommendations for NICE guidance

For each published interventional procedure guidance, we work with NHS England to provide relevant clinical coding information.

The mandated classifications (OPCS-4 or ICD-10) provide a method to collect and aggregate data to allow accurate and consistent data analysis.

NICE and NHS England Terminology and Classifications Delivery Service work collaboratively to ensure the most appropriate OPCS-4 and ICD-10 codes are provided.

NHS England is the national release centre for the UK edition of ICD-10 and OPCS-4. Further Classifications information, see [here](#).
