
IPG302 – Percutaneous laser revascularisation for refractory angina pectoris

The mandated classifications (OPCS-4 or ICD-10) provide a method to collect and aggregate data to allow accurate and consistent data analysis.

Procedure:

OPCS-4 code(s):

K23.4 Revascularisation of wall of heart

Y79.3 Transluminal approach to organ through femoral artery

Y08.5 Laser modification of organ NOC

Y53.4 Approach to organ under fluoroscopic control

Note: U20.1 Transthoracic echocardiography, U20.2 Transoesophageal echocardiography, U20.3 Intravascular echocardiography or U20.4 Epicardial echocardiography is also assigned when echocardiography is used during the procedure.

Diagnosis or health condition:

ICD-10 code(s):

I20.- Angina pectoris

Clinical coding recommendations for NICE guidance

For each published interventional procedure guidance, we work with NHS England to provide relevant clinical coding information.

The mandated classifications (OPCS-4 or ICD-10) provide a method to collect and aggregate data to allow accurate and consistent data analysis.

NICE and NHS England Terminology and Classifications Delivery Service work collaboratively to ensure the most appropriate OPCS-4 and ICD-10 codes are provided.

NHS England is the national release centre for the UK edition of ICD-10 and OPCS-4. Further Classifications information, see [here](#).
