

IPG363 - Minimally invasive total hip replacement

SNOMED CT provides clinical terms for entry into the patient record to record clinical information relevant to that encounter; the mandated classifications (OPCS-4 or ICD-10) provide a method to collect and aggregate data to allow accurate and consistent data analysis.

Procedure and device:

SNOMED CT preferred term (concept ID)

OPCS-4 code(s):

A code from one of the following OPCS-4 categories is assigned with the fourth character depending on the type of replacement procedure performed:

W37.- Total prosthetic replacement of hip joint using cement

W38.- Total prosthetic replacement of hip joint not using cement

W39.- Other total prosthetic replacement of hip joint

W93.- Hybrid prosthetic replacement of hip joint using cemented acetabular component

W94.- Hybrid prosthetic replacement of hip joint using cemented femoral component

W95.- Hybrid prosthetic replacement of hip joint using cement

Together with the following code to denote minimally invasive approach:

Y76.9 Unspecified minimal access to other body cavity

Includes: Minimally invasive approach to other body area NEC

Note: The OPCS-4 code **Y53.4 Approach to organ under fluoroscopic control** can be assigned in addition if fluoroscopic guidance is utilised.

Diagnosis or health condition:

SNOMED CT preferred term (concept ID)

ICD-10 code(s):

Clinical coding recommendations for NICE guidance

For each published interventional procedure and medical technologies guidance, we work with NHS Digital to provide relevant clinical coding information.

SNOMED CT provides clinical terms for entry into the patient record to store clinical information relevant to that encounter.

The mandated classifications (OPCS-4 or ICD-10) provide a method to collect and aggregate data to allow accurate and consistent data analysis.

The UK Edition of SNOMED CT is managed by the Clinical Terminology Service of NHS Digital. For further information including licensing, see [UK Terminology Centre — NHS Digital](#).

The Clinical Classifications Service of NHS Digital is the central definitive source for clinical coding guidance and determines the coding standards associated with the classifications (OPCS-4 and ICD-10) to be used across the NHS. The Clinical Classifications Service and NICE work collaboratively to ensure the most appropriate classification codes are provided. [Clinical Classifications Service — NHS Digital](#).
