

IPG468 - Phrenic nerve transfer in brachial plexus injury

The mandated classifications (OPCS-4 or ICD-10) provide a method to collect and aggregate data to allow accurate and consistent data analysis.

Procedure:

OPCS-4 code(s):

Where the nerve transfer is performed microsurgically:

A71.1 Primary microsurgical transfer of peripheral nerve

Or

A71.2 Secondary microsurgical transfer of peripheral nerve

Or

A71.4 Microsurgical transfer of peripheral nerve NEC

And

Z08.- Brachial plexus

Y54.2 Harvest of nerve of head

Z12.8 Specified nerve NEC

Where the method is not stated, or where the procedure is not performed microsurgically:

A73.6 Transfer and reimplantation of peripheral nerve NEC

Z08.- Brachial plexus

Y54.2 Harvest of nerve of head

Z12.8 Specified nerve NEC

Diagnosis or health condition:

ICD-10 code(s):

S14.3 Injury of brachial plexus

Clinical coding recommendations for NICE guidance

For each published interventional procedure guidance, we work with NHS England to provide relevant clinical coding information.

The mandated classifications (OPCS-4 or ICD-10) provide a method to collect and aggregate data to allow accurate and consistent data analysis.

NICE and NHS England Terminology and Classifications Delivery Service work collaboratively to ensure the most appropriate OPCS-4 and ICD-10 codes are provided.

NHS England is the national release centre for the UK edition of ICD-10 and OPCS-4. Further Classifications information, see [here](#).
