IPG474 Arthroscopic trochleoplasty for patellar instability

SNOMED CT provides clinical terms for entry into the patient record to record clinical information relevant to that encounter; the mandated classifications (OPCS-4 or ICD-10) provide a method to collect and aggregate data to allow accurate and consistent data analysis.

Procedure and device:

SNOMED CT preferred term (concept ID)

A request for a new SNOMED CT code has been submitted for the next release. SNOMED CT Submission Portal request reference number xxxxx.

OPCS-4 code(s):

> **W77.5 Periarticular osteotomy for stabilisation of joint**
>
> **Y76.7 Arthroscopic approach to joint**
>
> **Z76.6: Trochlear surface of femur**
>
> ***Note:*** that the patellofemoral ligament reconstruction would be coded in addition

Diagnosis or health condition:

SNOMED CT preferred term (concept ID)

A request for a new SNOMED CT code has been submitted for the next release. SNOMED CT Submission Portal request reference number xxxxx.

ICD-10 code(s):

> **M23.5 Chronic instability of knee**
>
> *With the relevant fifth character to indicate the site of involvement if known*

Or

> *With the relevant fourth character code from the following category:*
>
> **M22.-Disorders of the patella**

Clinical coding recommendations for NICE guidance

For each published interventional procedure and medical technologies guidance, we work with NHS Digital to provide relevant clinical coding information.

SNOMED CT provides clinical terms for entry into the patient record to store clinical information relevant to that encounter.

The mandated classifications (OPCS-4 or ICD-10) provide a method to collect and aggregate data to allow accurate and consistent data analysis.

NICE and NHS Digital Information Representation Services work collaboratively to ensure the most appropriate SNOMED CT, OPCS-4 and ICD codes are provided.

NHS Digital is the national release centre for the UK edition of SNOMED CT, ICD and OPCS-4. Further SNOMED CT information including licensing, see here. Further Classifications information, see here.
