## INTERVENTIONAL PROCEDURES PROGRAMME

### Equality impact assessment

#### IPG481 Optical coherence tomography to guide percutaneous coronary intervention

The impact on equality has been assessed during guidance development according to the principles of the NICE Equality scheme.

#### Scoping

1. Have any potential equality issues been identified during the scoping process (development of the scope or discussion at the Committee meeting), and, if so, what are they?

Coronary Heart Disease (CHD) prevalence increases with age. More than 60% intravascular imaging in England 2010/11 was done in people aged over 60.  
CHD is more prevalent in men (5.7%) than women (3.5%).  
Among ethnic groups in the UK, CHD was more common in men of Indian (6.4%) and Pakistani origin (8.2%) than in other ethnic groups.  
CHD prevalence is higher in disadvantaged groups.  
People are likely to be covered under disability in the Equality Act if their CHD significantly reduces their ability to carry out activities of daily living for more than 12 months or they are covered due to a co-existing long term condition or impairment.

2. What is the preliminary view as to what extent these potential equality issues need addressing by the Committee? (If there are exclusions listed in the scope (for example, populations, treatments or settings), are these justified?)

It was considered that these issues would not have an impact on the assessment of the procedure.

3. Has any change to the scope (such as additional issues raised during the Committee meeting) been agreed to highlight potential equality

issues?
No

## Consultation

1. Have the potential equality issues identified during the scoping process been addressed by the Committee, and, if so, how?
Not applicable

2. Have any other potential equality issues been raised in the overview, specialist adviser questionnaires or patient commentary, and, if so, how has the Committee addressed these?
No

3. Have any other potential equality issues been identified by the Committee, and, if so, how has the Committee addressed these?
No

4. Do the preliminary recommendations make it more difficult in practice for a specific group to access a technology or intervention compared with other groups? If so, what are the barriers to, or difficulties with, access for the specific group?
No

5. Is there potential for the preliminary recommendations to have an adverse impact on people with disabilities because of something that is a consequence of the disability?
---

Not applicable

6. Are there any recommendations or explanations that the Committee could make to remove or alleviate barriers to, or difficulties with, access identified in questions 4 or 5, or otherwise fulfil NICE's obligation to promote equality?

Not applicable

7. Have the Committee's considerations of equality issues been described in the consultation document, and, if so, where?

No

### **Final interventional procedures document**

1. Have any additional potential equality issues been raised during the consultation, and, if so, how has the Committee addressed these?

No

2. If the recommendations have changed after consultation, are there any recommendations that make it more difficult in practice for a specific group to access a technology or intervention compared with other groups? If so, what are the barriers to, or difficulties with, access for the specific group?

Not applicable

3. If the recommendations have changed after consultation, is there potential for the preliminary recommendations to have an adverse

impact on people with disabilities because of something that is a consequence of the disability?

Not applicable

4. If the recommendations have changed after consultation, are there any recommendations or explanations that the Committee could make to remove or alleviate barriers to, or difficulties with, access identified in questions 2 and 3, or otherwise fulfil NICE's obligations to promote equality?

Not applicable

5. Have the Committee's considerations of equality issues been described in the final interventional procedures document, and, if so, where?

Not applicable
