Y37.8 Other specified introduction of other substance into organ NOC

FMT via rectal enema:

H62.8 Other specified other operations on bowel

Y37.8 Other specified introduction of other substance into organ NOC

Diagnosis or health condition:

ICD-10 code(s):

A04.7 Enterocolitis due to *Clostridium difficile*

Clinical coding recommendations for NICE guidance

For each published interventional procedure guidance, we work with NHS England to provide relevant clinical coding information.

The mandated classifications (OPCS-4 or ICD-10) provide a method to collect and aggregate data to allow accurate and consistent data analysis.

NICE and NHS England Terminology and Classifications Delivery Service work collaboratively to ensure the most appropriate OPCS-4 and ICD-10 codes are provided.

NHS England is the national release centre for the UK edition of ICD-10 and OPCS-4. Further Classifications information, see [here](#).
