

## **IPG55 – Endoscopic injection of bulking agents for gastro-oesophageal reflux disease**

SNOMED CT provides clinical terms for entry into the patient record to record clinical information relevant to that encounter; the mandated classifications (OPCS-4 or ICD-10) provide a method to collect and aggregate data to allow accurate and consistent data analysis.

### **Procedure and device:**

#### **SNOMED CT preferred term (concept ID)**

Endoscopic injection of bulking agent to gastro-oesophageal junction  
(822391000000103)

#### **OPCS-4 code(s):**

**G44.8 Other specified other therapeutic fiberoptic endoscopic operations on upper gastrointestinal tract**

**Y39.3 Injection of inert substance into organ NOC**

**Y53.4 Approach to organ under fluoroscopic control**

**O11.1 Gastro-oesophageal junction**

### **Diagnosis or health condition:**

#### **SNOMED CT preferred term (concept ID)**

Gastroesophageal reflux disease (235595009)

#### **ICD-10 code(s):**

**K21.- Gastro-oesophageal reflux disease**

## **Clinical coding recommendations for NICE guidance**

For each published interventional procedure and medical technologies guidance, we work with the Health and Social Care Information Centre (HSCIC) to provide relevant clinical coding information.

SNOMED CT provides clinical terms for entry into the patient record to store clinical information relevant to that encounter.

The mandated classifications (OPCS-4 or ICD-10) provide a method to collect and aggregate data to allow accurate and consistent data analysis.

The UK Edition of SNOMED CT is managed by the Clinical Terminology Service of the Health and Social Care Information Centre. For further information including licensing, see [UK Terminology Centre — Health and Social Care Information Centre](#)

The Clinical Classifications Service of the Health and Social Care Information Centre is the central definitive source for clinical coding guidance and determines the coding standards associated with the classifications (OPCS-4 and ICD-10) to be used across the NHS. The Clinical Classifications Service and NICE work collaboratively to ensure the most appropriate classification codes are provided.
