

IPG570 Epiduroscopic lumbar discectomy through the sacral hiatus for sciatica

SNOMED CT provides clinical terms for entry into the patient record to record clinical information relevant to that encounter; the mandated classifications (OPCS-4 or ICD-10) provide a method to collect and aggregate data to allow accurate and consistent data analysis.

Procedure and device:

SNOMED CT preferred term (concept ID)

Epiduroscopic lumbar discectomy via sacral hiatus (1060691000000102)

OPCS-4 code(s):

V33.4 Primary anterior excision of lumbar intervertebral disc NEC

V55.- Levels of spine

Y76.3 Endoscopic approach to other body cavity

Y08.3 Laser destruction of organ NOC

Note: Codes within category **V55.-** are assigned in second place each time a spinal operation is coded: if the levels of spine are not specified, **V55.9 Unspecified levels of spine** is used.

Diagnosis or health condition:

SNOMED CT preferred term (concept ID)

Sciatica (23056005)

ICD-10 code(s):

M54.3 Sciatica

Clinical coding recommendations for NICE guidance

For each published interventional procedure and medical technologies guidance, we work with NHS Digital to provide relevant clinical coding information.

SNOMED CT provides clinical terms for entry into the patient record to store clinical information relevant to that encounter.

The mandated classifications (OPCS-4 or ICD-10) provide a method to collect and aggregate data to allow accurate and consistent data analysis.

NICE and NHS Digital Information Representation Services work collaboratively to ensure the most appropriate SNOMED CT, OPCS-4 and ICD codes are provided.

NHS Digital is the national release centre for the UK edition of SNOMED CT, ICD and OPCS-4. Further SNOMED CT information including licensing, see [here](#). Further Classifications information, see [here](#).
