

IPG649 - Percutaneous mitral valve leaflet repair for mitral regurgitation

The mandated classifications (OPCS-4 or ICD-10) provide a method to collect and aggregate data to allow accurate and consistent data analysis.

Procedure:

OPCS-4 code(s):

K25.5 Mitral valve repair NEC

Y76.8 Other specified minimal access to other body cavity

Y07.2 Clipping of organ (if performed)

Y53.4 Approach to organ under fluoroscopic control (if fluoroscopic imaging is used)

U20.2 Transoesophageal echocardiography

Y97.- Radiology with contrast

Y98.- Radiology procedures

Diagnosis or health condition:

ICD-10 code(s):

I34.0 Mitral (valve) insufficiency

Or

I02.0 Rheumatic chorea with heart involvement

Or

I05.1 Rheumatic mitral insufficiency

Or

I05.2 Mitral stenosis with insufficiency

Or

I08.0 Disorders of both mitral and aortic valves

Or

I08.1 Disorders of both mitral and tricuspid valves

Or

I08.3 Combined disorders of mitral, aortic and tricuspid valves

Or

Q23.3 Congenital mitral insufficiency

Clinical coding recommendations for NICE guidance

For each published interventional procedure guidance, we work with NHS England to provide relevant clinical coding information.

The mandated classifications (OPCS-4 or ICD-10) provide a method to collect and aggregate data to allow accurate and consistent data analysis.

NICE and NHS England Terminology and Classifications Delivery Service work collaboratively to ensure the most appropriate OPCS-4 and ICD-10 codes are provided.

NHS England is the national release centre for the UK edition of ICD-10 and OPCS-4. Further Classifications information, see [here](#).
