

## IP1720 Fetoscopic prenatal repair for open neural tube defects in the fetus

SNOMED CT provides clinical terms for entry into the patient record to record clinical information relevant to that encounter; the mandated classifications (OPCS-4 or ICD-10) provide a method to collect and aggregate data to allow accurate and consistent data analysis.

### **Procedure and device:**

#### **SNOMED CT preferred term (concept ID)**

Fetoscopic repair of fetal open spina bifida (1127971000000106)

#### **OPCS-4 code(s):**

**R01.8 Other specified therapeutic endoscopic operations on fetus**

**Y53.2 Approach to organ under ultrasonic control**

**Y95.- Gestational age**

### **Diagnosis or health condition:**

#### **SNOMED CT preferred term (concept ID)**

Fetal open spina bifida (144581000000105)

#### **ICD-10 code(s):**

**O35.0 Maternal care for (suspected) central nervous system malformation in fetus**

## **Clinical coding recommendations for NICE guidance**

For each published interventional procedure and medical technologies guidance, we work with NHS Digital to provide relevant clinical coding information.

SNOMED CT provides clinical terms for entry into the patient record to store clinical information relevant to that encounter.

The mandated classifications (OPCS-4 or ICD-10) provide a method to collect and aggregate data to allow accurate and consistent data analysis.

The UK Edition of SNOMED CT is managed by the Clinical Terminology Service of NHS Digital. For further information including licensing, see [here](#).

The Clinical Classifications Service of NHS Digital is the central definitive source for clinical coding guidance and determines the coding standards associated with the classifications (OPCS-4 and ICD-10) to be used across the NHS. The Clinical Classifications Service and NICE work collaboratively to ensure the most appropriate classification codes are provided. [Clinical Classifications Service — NHS Digital](#).
