

## IP1764 Self-expanding implant insertion into the intersphincteric space for faecal incontinence

SNOMED CT provides clinical terms for entry into the patient record to record clinical information relevant to that encounter; the mandated classifications (OPCS-4 or ICD-10) provide a method to collect and aggregate data to allow accurate and consistent data analysis.

### Procedure and device:

#### SNOMED CT preferred term (concept ID)

A request for a new SNOMED CT code has been submitted for the next release. [SNOMED CT Submission Portal request](#) reference number 31285.

#### OPCS-4.9 code(s):

**H57.1 Placement of artificial anal sphincter NEC**

**Y53.2 Approach to organ under ultrasonic control**

### Diagnosis or health condition:

#### SNOMED CT preferred term (concept ID)

Incontinence of feces (72042002)

#### ICD-10 code(s):

**R15.X Faecal incontinence**

**Note:** Code **R15.X** is classified to ICD-10 **Chapter XVIII Signs, symptoms and abnormal laboratory findings**. Generally, codes from this chapter are only assigned where no specific diagnosis has been made that explains the symptom. However, these codes may be used in a secondary position to a code for a specific diagnosis, where a symptom is treated as a problem in its own right. Consequently, **R15.X** may be sequence in a secondary position.

## Clinical coding recommendations for NICE guidance

For each published interventional procedure and medical technologies guidance, we work with NHS Digital to provide relevant clinical coding information.

SNOMED CT provides clinical terms for entry into the patient record to store clinical information relevant to that encounter.

The mandated classifications (OPCS-4 or ICD-10) provide a method to collect and aggregate data to allow accurate and consistent data analysis.

NICE and NHS Digital Information Representation Services work collaboratively to ensure the most appropriate SNOMED CT, OPCS-4 and ICD codes are provided.

NHS Digital is the national release centre for the UK edition of SNOMED CT, ICD and OPCS-4. Further SNOMED CT information including licensing, see [here](#). Further Classifications information, see [here](#).
