

IP1774 Transcervical ultrasound-guided radiofrequency ablation for symptomatic uterine fibroids

The mandated classifications (OPCS-4 or ICD-10) provide a method to collect and aggregate data to allow accurate and consistent data analysis.

Procedure and device:

OPCS-4 code(s):

Q16.7 Radiofrequency ablation of lesion of uterus

Y53.2 Approach to organ under ultrasonic control

Diagnosis or health condition:

ICD-10 code(s):

D25.- Leiomyoma of uterus

Clinical coding recommendations for NICE guidance

For each published interventional procedure and medical technologies guidance, we work with NHS Digital to provide relevant clinical coding information.

The mandated classifications (OPCS-4 or ICD-10) provide a method to collect and aggregate data to allow accurate and consistent data analysis.

NICE and NHS Digital Information Representation Services work collaboratively to ensure the most appropriate OPCS-4 and ICD-10 codes are provided.

NHS Digital is the national release centre for the UK edition of ICD-10 and OPCS-4. Further Classifications information, see [here](#).
