

Liposuction for chronic lipoedema

Information for the public

Published: 29 March 2022

www.nice.org.uk

This procedure can only be done as part of a research study. This is because there is not enough evidence to be sure how well it works or how safe it is.

Your healthcare professional should talk to you about the research.

In chronic lipoedema, the bottom, legs, and sometimes the arms become enlarged because of abnormal build-up of fat cells. This leads to pain, bruising and limited mobility. Under either general or local anaesthesia, the abnormal fat is removed using suction through punctures in the skin (liposuction). Afterwards, a compression garment must be worn most of the time for a few months after surgery. The procedure may need to be repeated. The aim is to reduce swelling and pain.

The [NHS website](#) may have information on your condition and treatment options.

Is this procedure right for me?

You should be included in [making decisions about your care](#).

Your healthcare professionals should explain the risks and benefits of this procedure and how it is done. They should discuss your options and listen carefully to your views and concerns. They should offer you more information about the procedure. Your family or carers can be involved if you want or need them to be.

You will be asked to decide whether you agree (consent) to have the procedure. Find out more about [giving consent to treatment on the NHS website](#).

Some questions to think about

- How many appointments will I need?
- What are the possible benefits? How likely am I to get them?
- What are the risks or side effects? How likely are they?
- Will I have to stay in hospital?
- What happens if it does not work or something goes wrong?
- What happens if I do not want the procedure?
- Are other treatments available?

More information

- [NICE's information on interventional procedures guidance](#) explains what an interventional procedure is and how we assess it.
- [NICE's information on interventional procedures recommendations](#) explains what only in research means.
