IP1824 - Prophylactic or therapeutic use of endoanchoring systems in endovascular aortic aneurysm repair

The mandated classifications (OPCS-4 or ICD-10) provide a method to collect and aggregate data to allow accurate and consistent data analysis.

Procedure:

OPCS-4 code(s):

Endoanchoring systems are not classifiable within OPCS-4 and the securing of a stent graft into place during an endovascular aneurysm repair (EVAR), is considered part of the EVAR procedure.

In instances where a patient returns to theatre to treat a postprocedural stent graft migration or endoleak, the following OPCS-4 codes are recommended:

> **L26.8 Other specified transluminal operations on aorta**
> **Y15.- Attention to stent in organ NOC**
> *Includes: Attention to stent graft in organ NOC*

Diagnosis or health condition:

ICD-10 code(s):

Postprocedural migration or endoleak of a stent graft:

> **T82.3 Mechanical complication of other vascular grafts**

Clinical coding recommendations for NICE guidance

For each published interventional procedure guidance, we work with NHS Digital to provide relevant clinical coding information.

The mandated classifications (OPCS-4 or ICD-10) provide a method to collect and aggregate data to allow accurate and consistent data analysis.

NICE and NHS Digital Information Representation Services work collaboratively to ensure the most appropriate OPCS-4 and ICD-10 codes are provided.

NHS Digital is the national release centre for the UK edition of ICD-10 and OPCS-4. Further Classifications information, see here.
