

IP1701 Prostatic urethral temporary implant insertion for lower urinary tract symptoms caused by benign prostatic hyperplasia

SNOMED CT provides clinical terms for entry into the patient record to record clinical information relevant to that encounter; the mandated classifications (OPCS-4 or ICD-10) provide a method to collect and aggregate data to allow accurate and consistent data analysis.

Procedure and device:

SNOMED CT preferred term (concept ID)

A request for a new SNOMED CT code has been submitted for the next release. [SNOMED CT Submission Portal request](#) reference number 25736.

OPCS-4 code(s):

M68.8 Other specified endoscopic insertion of prosthesis into prostate
Y70.5 Temporary operations

Diagnosis or health condition:

SNOMED CT preferred term (concept ID)

Lower urinary tract symptoms due to benign prostatic hypertrophy
(30041000119101)

ICD-10 code(s):

N40.X Hyperplasia of prostate

Clinical coding recommendations for NICE guidance

For each published interventional procedure and medical technologies guidance, we work with NHS Digital to provide relevant clinical coding information.

SNOMED CT provides clinical terms for entry into the patient record to store clinical information relevant to that encounter.

The mandated classifications (OPCS-4 or ICD-10) provide a method to collect and aggregate data to allow accurate and consistent data analysis.

NICE and NHS Digital Information Representation Services work collaboratively to ensure the most appropriate SNOMED CT, OPCS-4 and ICD codes are provided.

NHS Digital is the national release centre for the UK edition of SNOMED CT, ICD and OPCS-4. Further SNOMED CT information including licensing, see [here](#). Further Classifications information, see [here](#).
