

IP1868 – Percutaneous ultrasound - guided microwave ablation for symptomatic benign thyroid nodules

The mandated classifications (OPCS-4 or ICD-10) provide a method to collect and aggregate data to allow accurate and consistent data analysis.

Procedure:

OPCS-4 code(s):

B12.8 Other specified other operations on thyroid gland

Y13.7 Microwave destruction of lesion of organ NOC

Y53.2 Approach to organ under ultrasonic control

Diagnosis or health condition:

ICD-10 code(s):

E04.1 Nontoxic single thyroid nodule

Or

E05.1 Thyrotoxicosis with toxic single thyroid nodule

Or

D34.X Benign neoplasm of thyroid gland

Clinical coding recommendations for NICE guidance

For each published interventional procedure guidance, we work with NHS Digital to provide relevant clinical coding information.

The mandated classifications (OPCS-4 or ICD-10) provide a method to collect and aggregate data to allow accurate and consistent data analysis.

NICE and NHS Digital Information Representation Services work collaboratively to ensure the most appropriate OPCS-4 and ICD-10 codes are provided.

NHS Digital is the national release centre for the UK edition of ICD-10 and OPCS-4. Further Classifications information, see [here](#).
