INTERVENTIONAL PROCEDURES PROGRAMME

Equality impact assessment

IPG760 Daytime intraoral neuromuscular electrical tongue stimulation using a removable device for obstructive sleep apnoea

The impact on equality has been assessed during guidance development according to the principles of the NICE Equality scheme.

Briefing

1. Have any potential equality issues been identified during the briefing process (development of the brief or discussion at the committee meeting), and, if so, what are they?

Age: Obstructive sleep apnoea (OSA) is more common in people who are over 40 and its prevalence increases with age.

Gender: OSA may be more common in men than women.

Socioeconomic status: OSA is more common in people of lower socioeconomic status.

Disability: Some people with severe OSA are likely to be covered by the Equality Act if their condition has had a substantial adverse impact on normal day to day activities for over12 months or is likely to do so.

2. What is the preliminary view as to what extent these potential equality issues need addressing by the committee? (If there are exclusions listed in the brief (for example, populations, treatments or settings), are these justified?)

This was not thought to have an impact on the assessment of the procedure. No exclusions were applied.

3.	Has any change to the brief (such as additional issues raised during the committee meeting) been agreed to highlight potential equality issues?
No	
4.	Have any additional stakeholders related to potential equality issues been identified during the committee meeting, and, if so, have changes to the stakeholder list been made?'
No	
Cons 1.	ultation Have the potential equality issues identified during the briefing process been addressed by the committee, and, if so, how?
	process been addressed by the committee, and, if so, how? key evidence showed that the mean age of patients ranged from 43 to ears, and they were more likely to be male.
No s	pecific data relating to other issues mentioned earlier was identified in iterature presented in the overview.
2.	Have any other potential equality issues been raised in the overview, specialist adviser questionnaires or patient commentary, and, if so, how has the committee addressed these?
No	
3.	Have any other potential equality issues been identified by the

No		
4.	Do the preliminary recommendations make it more difficult in practice for a specific group to access a technology or intervention compared with other groups? If so, what are the barriers to, or difficulties with, access for the specific group?	
No		
5.	Is there potential for the preliminary recommendations to have an adverse impact on people with disabilities because of something that is a consequence of the disability?	
Not applicable		
6.	Are there any recommendations or explanations that the committee could make to remove or alleviate barriers to, or difficulties with, access identified in questions 4 or 5, or otherwise fulfil NICE's obligation to promote equality?	
Not applicable		
7.	Have the committee's considerations of equality issues been described in the consultation document, and, if so, where?	
No

Final interventional procedures document

1. Have any additional potential equality issues been raised during the consultation, and, if so, how has the committee addressed these? No 2. If the recommendations have changed after consultation, are there any recommendations that make it more difficult in practice for a specific group to access a technology or intervention compared with other groups? If so, what are the barriers to, or difficulties with, access for the specific group? Not applicable 3. If the recommendations have changed after consultation, is there potential for the preliminary recommendations to have an adverse impact on people with disabilities because of something that is a consequence of the disability? Not applicable 4. If the recommendations have changed after consultation, are there any recommendations or explanations that the committee could make to remove or alleviate barriers to, or difficulties with, access identified in questions 2 and 3, or otherwise fulfil NICE's obligations to promote equality? Not applicable		
2.
