

IP1919 - Intraoperative electron beam radiotherapy for locally advanced and locally recurrent colorectal cancer

The mandated classifications (OPCS-4 or ICD-10) provide a method to collect and aggregate data to allow accurate and consistent data analysis.

Procedure:

OPCS-4 code(s):

X65.4 Delivery of a fraction of external beam radiotherapy NEC

Y91.6 Intraoperative electron beam radiotherapy

The above codes are assigned in addition to the codes for the resection of the tumour.

Diagnosis or health condition:

ICD-10 code(s):

C18.- Malignant neoplasm of colon

Or

C19.X Malignant neoplasm of rectosigmoid junction

Includes: Colon with rectum

Or

C20.X Malignant neoplasm of rectum

Or

C78.5 Secondary malignant neoplasm of large intestine and rectum

Clinical coding recommendations for NICE guidance

For each published interventional procedure guidance, we work with NHS Digital to provide relevant clinical coding information.

The mandated classifications (OPCS-4 or ICD-10) provide a method to collect and aggregate data to allow accurate and consistent data analysis.

NICE and NHS Digital Information Representation Services work collaboratively to ensure the most appropriate OPCS-4 and ICD-10 codes are provided.

NHS Digital is the national release centre for the UK edition of ICD-10 and OPCS-4. Further Classifications information, see [here](#).
