INTERVENTIONAL PROCEDURES PROGRAMME

Equality impact assessment

IPG777 Percutaneous transarterial carotid artery stent placement for asymptomatic extracranial carotid stenosis

The impact on equality has been assessed during guidance development according to the principles of the NICE Equality scheme.

Briefing

- | |
|---|
| 1. Have any potential equality issues been identified during the briefing process (development of the brief or discussion at the committee meeting), and, if so, what are they? |
|---|

The prevalence of asymptomatic carotid stenosis ranges from 0.2% in men below the age of 50 years to 7.5% in men and 5.0% in women 80 years or older. Carotid stenosis causes about 10% to 15% of ischaemic strokes.
--

- | |
|--|
| 2. What is the preliminary view as to what extent these potential equality issues need addressing by the committee? (If there are exclusions listed in the brief (for example, populations, treatments or settings), are these justified?) |
|--|

This was not thought to have an impact on the assessment of the procedure. No exclusions were applied.
--

- | |
|--|
| 3. Has any change to the brief (such as additional issues raised during the committee meeting) been agreed to highlight potential equality issues? |
|--|

No

4. Have any additional stakeholders related to potential equality issues been identified during the committee meeting, and, if so, have changes to the stakeholder list been made?

No

Consultation

1. Have the potential equality issues identified during the briefing process been addressed by the committee, and, if so, how?

In the studies that reported it, the mean age ranged from 64 to 76 years and the median ranged from 69 to 71 years.

2. Have any other potential equality issues been raised in the overview, specialist adviser questionnaires or patient commentary, and, if so, how has the committee addressed these?

No

3. Have any other potential equality issues been identified by the committee, and, if so, how has the committee addressed these?

No

4. Do the preliminary recommendations make it more difficult in practice for a specific group to access a technology or intervention compared with other groups? If so, what are the barriers to, or difficulties with, access for the specific group?

No

5. Is there potential for the preliminary recommendations to have an adverse impact on people with disabilities because of something that is a consequence of the disability?

Not applicable

6. Are there any recommendations or explanations that the committee could make to remove or alleviate barriers to, or difficulties with, access identified in questions 4 or 5, or otherwise fulfil NICE's obligation to promote equality?

Not applicable

7. Have the committee's considerations of equality issues been described in the consultation document, and, if so, where?

No

Final interventional procedures document

1. Have any additional potential equality issues been raised during the consultation, and, if so, how has the committee addressed these?

No

2. If the recommendations have changed after consultation, are there any recommendations that make it more difficult in practice for a specific group to access a technology or intervention compared with other groups? If so, what are the barriers to, or difficulties with, access for the specific group?
Not applicable

3. If the recommendations have changed after consultation, is there potential for the preliminary recommendations to have an adverse impact on people with disabilities because of something that is a consequence of the disability?
Not applicable

4. If the recommendations have changed after consultation, are there any recommendations or explanations that the committee could make to remove or alleviate barriers to, or difficulties with, access identified in questions 2 and 3, or otherwise fulfil NICE's obligations to promote equality?
Not applicable

5. Have the committee's considerations of equality issues been described in the final interventional procedures document, and, if so, where?
No
