

IP1929 – Percutaneous thrombectomy for massive pulmonary embolus

The mandated classifications (OPCS-4 or ICD-10) provide a method to collect and aggregate data to allow accurate and consistent data analysis.

Procedure:

OPCS-4 code(s):

L13.1 Percutaneous transluminal embolectomy of pulmonary artery

Includes: Percutaneous transluminal thrombectomy of pulmonary artery

Y53.- Approach to organ under image control

Or

Y68.- Other approach to organ under image control

Plus

Z94.- Laterality of operation

Diagnosis or health condition:

ICD-10 code(s):

I26.- Pulmonary embolism

Or

O08.2 Embolism following abortion and ectopic and molar pregnancy

Includes pulmonary embolus following abortion or ectopic or molar pregnancy

Or

O88.2 – Obstetric blood-clot embolism

Clinical coding recommendations for NICE guidance

For each published interventional procedure guidance, we work with NHS England to provide relevant clinical coding information.

The mandated classifications (OPCS-4 or ICD-10) provide a method to collect and aggregate data to allow accurate and consistent data analysis.

NICE and NHS England Terminology and Classifications Delivery Service work collaboratively to ensure the most appropriate OPCS-4 and ICD-10 codes are provided.

NHS England is the national release centre for the UK edition of ICD-10 and OPCS-4. Further Classifications information, see [here](#).
