

IP1692/2 - Unilateral MRI-guided focused ultrasound thalamotomy for moderate-to-severe tremor in Parkinson's disease

The mandated classifications (OPCS-4 or ICD-10) provide a method to collect and aggregate data to allow accurate and consistent data analysis.

Procedure:

OPCS-4 code(s):

A03.2 Stereotactic ablation of tissue of thalamus

Y11.5 Ultrasonic destruction of organ NOC

Y53.7 Approach to organ under magnetic resonance imaging control

Diagnosis or health condition:

ICD-10 code(s):

G20 Parkinson disease

Or

G21 Secondary parkinsonism

Or

A52.1† Symptomatic neurosyphilis

G22* Parkinsonism in diseases classified elsewhere

Clinical coding recommendations for NICE guidance

For each published interventional procedure guidance, we work with NHS England to provide relevant clinical coding information.

The mandated classifications (OPCS-4 or ICD-10) provide a method to collect and aggregate data to allow accurate and consistent data analysis.

NICE and NHS England Terminology and Classifications Delivery Service work collaboratively to ensure the most appropriate OPCS-4 and ICD-10 codes are provided.

NHS England is the national release centre for the UK edition of ICD-10 and OPCS-4. Further Classifications information, see [here](#).
