**Equality impact assessment – Topic selection and  
scoping**

**HeartFlow FFR<sub>CT</sub> for the computation of fractional flow  
reserve from coronary CT angiography**

The impact on equality has been assessed during this evaluation according to the principles of the NICE Equality scheme.

1. Have any potential equality issues been identified during the development of the briefing note or during the Committee meeting, and, if so, what are they?

CHD is more common in males than females. Individuals with severe forms of CHD may not be able to carry out normal activities and may therefore be considered disabled under the Equalities Act

No equality issues were identified during the Committee meeting

2. What is the preliminary view as to what extent these potential equality issues need addressing by the Committee?

No action required.

3. Does the scope need to highlight any potential equality issues? If so, how?

No action required.
