

iFuse for treating chronic sacroiliac joint pain

Information for the public
Published: 2 October 2018

www.nice.org.uk

NICE has assessed iFuse for treating chronic sacroiliac joint pain to help the NHS decide whether to use this product.

Using iFuse leads to improved pain relief, better quality of life and less disability compared with non-surgical management. It is an option for people with chronic sacroiliac joint pain when non-surgical management is not effective.
