## Medical technologies evaluation programme

### Equality impact assessment: Topic selection and scoping

#### GID-MT569 Memokath-051 stent for ureteric obstruction

The impact on equality has been assessed during this evaluation according to the principles of the [NICE Equality scheme](#).

**1.** Have any potential equality issues been identified during the development of the topic briefing note or during selection, and, if so, what are they?

Some people will have strictures due to cancer. All people with cancer are protected under the Equality Act 2010 from the point of diagnosis.

**2.** What is the preliminary view as to what extent these potential equality issues need addressing by the committee?

It is unlikely that this equality consideration would hinder access of the technology for people with protected characteristics.

**3.** Has any change to the draft scope been agreed to highlight potential equality issues?

No. The information above was included as a special consideration.

**4.** Have any additional stakeholders related to potential equality issues been identified during the scoping process, and, if so, have changes to the stakeholder list been made?

No additional stakeholder related to potential equality issues were identified.

**Approved by Associate Director: Anastasia Chalkidou**
