## NICE guidelines

### Equality impact assessment

#### Pancreatitis: Diagnosis and Management

The impact on equality has been assessed during guidance development according to the principles of the NICE equality policy.

#### **1.0 Scope: before consultation (To be completed by the developer and submitted with the draft scope for consultation)**

1.1 Have any potential equality issues been identified during the development of the draft scope, before consultation, and, if so, what are they?

During the development of the draft scope, it was recognised that no groups were identified which require special consideration to ensure equal opportunity to access services.

1.2 What is the preliminary view on the extent to which these potential equality issues need addressing by the Committee? For example, if population groups, treatments or settings are excluded from the scope, are these exclusions justified – that is, are the reasons legitimate and the exclusion proportionate?

- N/A
