Patient decision aids (PDAs) help people decide on healthcare options. They provide evidence-based information on the options available, along with likely outcomes, benefits, harms and uncertainties.

They should be used to inform conversations between a person and their healthcare professional, supporting them to make informed choices in line with their personal values and preferences.

Our [process guide outlines how we develop our PDAs](#).

See our PDAs (PDFs only) on:

- [Reducing the chance of recurrent urinary tract infection \(UTI\) in premenopausal women who are not pregnant](#)
- [Reducing the chance of recurrent urinary tract infection \(UTI\) in postmenopausal women](#)

There is also a [user guide for these PDAs](#).
