

Evidence reviews – April 2019

Evidence review

Published: 2 April 2019

www.nice.org.uk

In April 2019, we reviewed the evidence for urinary incontinence and pelvic organ prolapse in the following areas:

- [Urodynamic assessment prior to primary surgery for stress urinary incontinence](#)
- [Treatment options for women using absorbent containment products](#)
- [Risks to cognitive function for women taking anticholinergic drugs for overactive bladder](#)
- [Management of overactive bladder](#)
- [Surgical and physical management of stress urinary incontinence](#)
- [Effectiveness of multidisciplinary teams for the assessment and management of urinary incontinence or pelvic organ prolapse](#)
- [Assessing pelvic organ prolapse](#)
- [Lifestyle and conservative management options for pelvic organ prolapse](#)
- [Surgical management of pelvic organ prolapse](#)
- [Surgical management of pelvic organ prolapse and stress urinary incontinence](#)
- [Assessing mesh complications after pelvic floor mesh surgery](#)
- [Management of mesh complications](#)
