Economic Plan

This document identifies the areas prioritised for economic modelling. The final analysis may differ from those described below. The rationale for any differences will be explained in the guideline.

1 Guideline

Prostate Cancer: Diagnosis and management

2 List of Modelling Questions

Review questions by scope area	Review question:
	RQ8 What is the most clinically- and cost-effective follow-up protocol for people who have a raised PSA, negative MRI and/ or negative biopsy?
Population	People who have a raised PSA, negative MRI and/ or negative biopsy
Interventions considered for inclusion	Different follow-up strategies, including screening tests, based on PSA and its derivatives (PSA density, velocity and % free forms) at given intervals, that trigger further investigation
Type of analysis	Lifetime cost–utility analysis
