

1.0.7 DOC EIA (2019)

NATIONAL INSTITUTE FOR HEALTH AND CARE EXCELLENCE

Equality impact assessment

Skin cancers including melanoma (update)

The impact on equality has been assessed during guidance development according to the principles of the NICE equality policy.

2.0 Checking for updates and scope: after consultation (to be completed by the Developer and submitted with the revised scope)

2.1 Have any potential equality issues been identified during consultation, and, if so, what are they?

No additional equality issues were identified during the consultation of the scope.

2.2 Have any changes to the scope been made as a result of consultation to highlight potential equality issues?

No additional equality issues were identified during the consultation of the scope, therefore no changes were made to the scope in relation to equality issues.

2.3 Have any of the changes made led to a change in the primary focus of the guideline which would require consideration of a specific communication or engagement need, related to disability, age, or other equality consideration?

If so, what is it and what action might be taken by NICE or the developer to meet this need? (For example, adjustments to committee processes, additional forms of consultation)

1.0.7 DOC EIA (2019)

No.
