

# Abdominal aortic aneurysm: diagnosis and management

**NICE guideline: acknowledgments**

*NICE guideline NG156*

*Authors and contributors*

*March 2020*

*Final*

*Commissioned by the National Institute for Health and Care Excellence*

## **Disclaimer**

The recommendations in this guideline represent the view of NICE, arrived at after careful consideration of the evidence available. When exercising their judgement, professionals are expected to take this guideline fully into account, alongside the individual needs, preferences and values of their patients or service users. The recommendations in this guideline are not mandatory and the guideline does not override the responsibility of healthcare professionals to make decisions appropriate to the circumstances of the individual patient, in consultation with the patient and, where appropriate, their carer or guardian.

Local commissioners and providers have a responsibility to enable the guideline to be applied when individual health professionals and their patients or service users wish to use it. They should do so in the context of local and national priorities for funding and developing services, and in light of their duties to have due regard to the need to eliminate unlawful discrimination, to advance equality of opportunity and to reduce health inequalities. Nothing in this guideline should be interpreted in a way that would be inconsistent with compliance with those duties.

NICE guidelines cover health and care in England. Decisions on how they apply in other UK countries are made by ministers in the [Welsh Government](#), [Scottish Government](#), and [Northern Ireland Executive](#). All NICE guidance is subject to regular review and may be updated or withdrawn.

## 1.3 Acknowledgements

The development of this guideline was greatly assisted by the following people:

- The EVAR trial investigators, particularly Professor Roger Greenhalgh (Imperial College London), for providing access to anonymised survival data from the EVAR-1 and EVAR-2 trials.
- The IMPROVE trial investigators, particularly Professor Janet Powell (Imperial College London), for providing access to anonymised survival data from the IMPROVE trial.
- Professor Kevin Mani (Uppsala University, Sweden) and colleagues, for providing additional analyses of the predictors of perioperative mortality, from their work on Vascunet registry data.
- Professor David Cromwell (Royal College of Surgeons) and colleagues, for providing additional information and data from the National Vascular Registry.
- Mr Jonothan Earnshaw (Gloucestershire Hospitals NHS Foundation Trust) and colleagues, for providing access to summary data on the characteristics of aneurysms screened as part of the NHS AAA Screening Programme.
- Cochrane Vascular Group, particularly Marlene Stewart (University of Edinburgh), for updating a number of their reviews and re-running literature searches.
