This tool can help you decide between treatment options.

It is for parents or carers of children younger than 12 years who have glue ear with hearing loss. You can go through it and use it to help you talk to your child's care team. Your child's care team includes people from different health professions and specialties who help to manage your child's glue ear, for example, audiologists, surgeons and other ear specialists.

This resource was produced by NICE on behalf of NHS England.

See the [decision support tool: making a decision about glue ear if your child has hearing loss](#) on the NHS England website.
